Privacy Policy for KRYSTAL

Effective date: August 5, 2026

KRYSTAL ("the app") is a companion app for a compatible Bluetooth device. Your privacy is important to us. This policy explains what the app does and does not do with your information. In short: the app does not collect, store, or share any personal data.

Information we collect

None. KRYSTAL does not collect, transmit, or sell any personal information. The app has no user accounts, no analytics, and no advertising, and it does not send your data to us or to any third party.

Microphone

When you turn on listening (an explicit, user-controlled toggle that is off by default), the app uses the microphone to transcribe what you say and detect the emotional tone of your words so the device can react. KRYSTAL does not analyze the sound of your voice (such as pitch, volume, or inflection). This happens entirely on your device, in real time. Your audio is never recorded, saved, or transmitted off your device, and no transcript or recording is stored.

Bluetooth

The app uses Bluetooth solely to connect to and control your device and any other compatible Bluetooth accessory you choose to use with it, such as a Park Band that mirrors your device's reactions. These are local Bluetooth connections; no data is sent over the internet, and if you pair such an accessory it is remembered only on your device.

Camera and photos

If you choose to add a photo of your device, KRYSTAL uses the camera (only when you tap "Take photo") or the system photo picker to select an existing image. The photo is stored only on your device and is never uploaded.

Notifications

KRYSTAL can show your device's reactions on a paired Apple Watch. These notifications are generated on your device; no notification data is sent to us or over the internet.

Withdrawing permissions

You can turn any of these permissions on or off at any time in the iOS Settings app; doing so only affects the related feature, and the rest of the app keeps working.

Navigation (Travel Mode)

KRYSTAL does not collect, track, or transmit your location, and it does not request location permission. If you use Travel Mode to navigate, it opens the maps app you choose (such as Apple Maps or Google Maps), which is governed by that app's own privacy policy.

Data storage

Any settings and content you create, such as your device's name, model, and personality, your saved Travel Mode destinations, and the photo you add for your device, are stored only on your device using the operating system's standard storage. This information is not uploaded anywhere.

Security

The information KRYSTAL creates never leaves your device and is protected by your device's standard operating-system security. We operate no servers and store none of your data, so there is no server-side information that could be exposed.

Your rights

Because KRYSTAL does not collect, store, or transmit any personal data, there is no personal information for us to access, correct, export, or delete, and we have nothing to sell or share, we never receive any data about you. Everything the app creates (your settings, saved destinations, and device photo) lives only on your device; deleting the app removes it. Depending on where you live, you may have rights under laws such as the GDPR or CCPA, since we hold no data about you, there is nothing for such a request to act on, but you are welcome to contact us with any question.

Children's privacy

The app does not collect any information from anyone, including children.

Changes to this policy

If this policy changes, the updated version will be posted at this same location with a new effective date.
